

Atoy Baltic Pro Drift Championship & Super Finals, Kehala 2021
2021 Technical inspection decision no. 1

09/04/2021

The chief scrutineer of the technical inspection took fuel samples from the petrol tank of the competitor LV03 Aleksandrs Vlasovs car.

ESTONIAN DRIFT CUP STREET CLASS TECHNICAL REGULATIONS 2021

p. 5 - FUEL - Only normal commercial fuel sold for automobile use in Estonia is allowed - petrol, diesel. The use of bioethanol (E85) fuel is prohibited.

Brief description of the situation:

Competitor LV03 Aleksandrs Vlasovs posted on Instagram that he refueled E85 fuel in the competition car. The race car did not have a corresponding marking that E85 fuel is used. The competitor admitted that his race car has ethanol fuel. The chief judge of the competition allowed the competitor to continue competing if competitor would change the fuel of competition car to petrol. During the supervision of technical inspection, the fuel was changed. DK Technical inspection chief scrutineer took fuel samples that were sealed and where signed by chief scrutineer and competitor.

Three fuel samples were taken:

1. Fuel sample after the first tandem run
2. Fuel sample after the first tandem run (that was given to competitor)
3. Fuel sample after the end of competitor last race.

Decision:

Fuel samples are sent officially for testing to following facility:

*EESTI KESKKONNAUURINGUTE KESKUS OÜ
Fuel Quality and Customs Services Department
Ethanol content 150.00€ + VAT*

The fee for testing samples has to be paid by the competitor according to the invoice from Eesti Drifti Liit MTÜ.

*Chief Scrutineer of Technical Inspection
of the Drift Committee of the
Estonian Motorsport Association
Fred Möls*
